TEMPORARY AND SPECIAL SERVICES

Page 1 of 1

A. Where service connections are available, temporary sewer service will be provided for under the Company's established rules, regulations, and rates for the type of service required; provided, however, that the customer shall pay, in addition to the cost of service rendered under its applicable rate, the cost of installing and removing, of connecting and disconnecting the necessary facilities required to provide such services.

B. Temporary and special service connections are primarily available to provide for sewer service during states of building construction prior to the permanent connection to the completed structure. Service for specialized usage shall be considered as a special case when not covered by a specific rate or schedule filed for the specialized usage.
